

# ST2022-1/2 - ASI Gateways Apps

The two ST2022-1/2 - ASI Gateway Apps can be used to encapsulate ASI into ST2022-1/2 or de-encapsulate ST2022-1/2 back to ASI. These gateways provide a cost-effective solution to transport your ASI signals into standard IP network.

## Features:

- FEC Support
- 188 & 204 bytes size support
- Support of ST2022-7 Class A
- MediorSet configuration software
- Simple Restful API for third party control system

## Benefits

- Use an IP network to route your real time media
- High density, low weight and power
- Fully robust and redundant solution

## Ordering Info:

The MuoN-APP-A1 can be installed on MuoN A1 platforms. Make sure to properly match the direction of the I/O with the corresponding software to obtain the desired result.
