

ST2110 – MADI Bi-directional Gateway Apps

IP ST2110-30 – MADI bi-directional gateway

Riedel's ST2110-30 - MADI bi-directional Gateway App can be installed on the MuoN A1 SFP platform. The low-cost solution provides encapsulation and de-encapsulation of a MADI signal to IP. Eight flows of audio can be used to re-map up to 64 audio channels as desired.

Features:

- ST2110-30/31 encapsulation
- 64 MADI (AES-10) audio bi-directional
- Built-in audio frame rate converter
- Support of ST2022-7
- Flexible audio shuffling and breakaway
- In-band control with support of EMBER+ and RESTful APIs

Benefits

- Simply interface to bring a large quantity of audio channels into an IP ST2110 network
- High density, low weight and power
